MITHANDIR

PELOKITOS

A kids' salon, four different interfaces

Multi-country, multi-tenant product with a dedicated view for every role in the operation.

PROBLEM PRODUCT EXPERIENCE ARCHITECTURE

/ 01

The problem

The same operation seen by four different people (owner, staff, customer and the in-store kiosk) is not solved with a single screen.

/ 02

The product

A multi-tenant system with real roles, designed from the start to run in more than one country.

/ 03

The four views

- Admin
- Staff
- Customer
- Kiosk

/ 04

Architecture

React, TypeScript, Vite and Tailwind on Supabase, with tenant isolation at the database level and role-based access policies.
